## The Model T and Productivity

Explain how each of the following changes in the production of the Model T helped Henry Ford increase productivity. Frame your response in terms of reductions in input and increases in output.

- 1. The standardization of parts
- 2. Expanding operation of the Highland Park Plant to 3 shifts a day
- 3. Offering the Model T in only one color
- 4. Instituting the \$5 day
- 5. Establishing rules on worker gambling
- 6. Building a factory with windows that provided lots of natural
- 7. Designing a machine that makes a part faster than workers could make it by hand
- 8. Buying a rubber plantation
- 9. Buying ships
- 10. Operating an iron foundry next to the factory where vehicles are assembled.
